Metal objects can be heavy and have edges (but not sharp) and need to be handled carefully. Scout adults to be conscious of the weight of some of the objects in relation to the size of young people involved. There must be sufficient Scout adults to ensure adequate monitoring and control of young people.	
Pointing a period musket (gun) at another person.	All	0	Whilst there is no chance of a musket firing, it is a 'skill for life' to know that you never point a gun, loaded or not, at another living thing. Scout adults to ensure that this message is understood and complied with.	0

Severity Factor & Remaining Risk Assessment

Level	Severity Description	Residual Risk Description
1	Very Low, i.e. splinters	Very low, minimal risk, control measures more than adequate
2	Minor injury, i.e. cut/grazing	Low, control measures satisfactory
3	Medium, injury would stop casualty from continuing with activity	Medium, control measures adequate
4	Serious injury requiring medical attention, i.e. broken bone, deep cut	High, control measures need further consideration
5	Extremely harmful, very serious injury or fatality	Very high, intolerable, stop activity
